Toilet & Bathroom Cleaning: Glass-Mirror-Chrome-Acrylic-Porcelain-Marble

Wherever water dries up, mineral deposits will occur. Dry the glass after every shower!
Always Like New: NANO-CERAMIC has a superior range of products.

NANO-CERAMIC SIO6 is an invisible, high-tech glass coating that seals pores with a nano silica layer, which provides a remarkable hydrophobic effect, so surfaces stay drier and cleaner. The coating disappears over time due to abrasion and can last up to 3 years if used in combination with SIMC and our SHRE Shampoo. Use our Steril Cleaner before application. Easy to apply with a foam pad. Just apply, wait 2 minutes, and gently buff off.

NANO-CERAMIC SHRE (Reactivating Pure Shine Shampoo). This shampoo contains no polymers or colors and will not leave a film of chemicals behind on the surface. Conventional chemicals destroy the hydrophobic effect that our nano layer provides. Build-up of unnecessary chemicals can cause serious and permanent coloration damage to all kinds of surfaces. (Color is added to conventional shampoos for marketing purposes only!)

NANO-CERAMIC SIMC (Si-Multi Cleaner) bonds while cleaning, creating semi-permanent molecular bonds while imparting a disinfecting hydrophobic nano layer to the surface. If the shower is used daily, we recommend to use SIMC once every 2 weeks. In case you have hard water in your area, we advise to use it once a week. Please note that this sealer helps to make the surface as dry as possible. Remember to dry shower doors after each use to minimize water spots.

NANO-CERAMIC WSRE (Water Spot Remover) is fully biodegradable and safe for your skin. WRSE is made from environmentally friendly acids that can effectively dissolve calcium, magnesium, iron, and lime deposits on glass, chrome, porcelain, marble, and many other materials. We advise adding a little to our SHRE Shampoo when you wash every month. If the mineral deposits are very thick, use WSRE in its undiluted form.

NANO-CERAMIC SCRUB (Scrub Pre-treatment) is a gentle but powerful scouring and cleaning compound, suitable for scrubbing glass, chrome, stainless steel, porcelain, marble, and many other materials without scratching the surface.

NANO-CERAMIC If the glass surface is so badly affected that it can not be cleaned with our SCRUB or WSRE remover, then please call our nearest distributor. They will be able to provide professional assistance to effectively clean and polish the surface.
**Interior Cleaning:** Glass-Kitchen-Doors-Table Tops-Flooring--Carpet-Stainless
Always Like New: NANO-CERAMIC has a superior range of products.

**NANO-CERAMIC SHRE (Reactivating Pure Shine Shampoo).** This shampoo contains no polymers or colors and will not leave a film of chemicals behind on the surface. **NANO-CERAMIC SIFP (Si-Floor Protector) is a completely new formula that makes your flooring 2 times harder and more durable. It is so easy to apply: Simply dilute it 1:9 with water. This polish saves time and is easier to apply than other conventional polish compounds because you don't need to add extra water during polishing. Simply polish the surface until almost dry and remove the residue.**

**REGULAR POLISHING**  
**FLOOR POLISH**

**NANO-CERAMIC SIO7 is an ultra long-lasting invisible hydrophobic coating which forms near-permanent molecular bonds with the surface in two simple steps: Clean and Apply. Fingerprints can easily be removed with a dry microfiber towel. The surface is more hygienic because the smooth coating keeps bacteria from sticking. The coating has an anti-scratch hardness of H9 and protects the surface against corrosion. (Can be used in showers and on chrome surfaces).**

**LONG-LASTING PROTECTION**  
**STAINLESS STEEL COATING**

SI06

Protector Kit
Glass / Ceramics / Mirrors

Product ID: SIO60KIT 30 ml +/- 15 m²  
SIO60100 100 ml +/- 50 m²  
Consumption: +/- 2 ml/m²  
Used for: Glass, ceramics, mirrors, marble  
Application field: Hotels, office buildings, residential housing, airports, medical centers, schools & more  

SI06 is an ultra long-lasting invisible surface coating which forms semi-permanent molecular bonds with the surface. The main function of treating hard surfaces with SI06 is to seal tiny pores, making it a smoother surface that will repel water and contaminants.

• Two simple steps: Clean and Apply  
• Makes the surface much easier and quicker to clean, and the adhesion of dirt is reduced drastically.  
• Promotes more hygienic surfaces.  
• This coating has an outstanding hydrophobic effect, and the surface stays cleaner longer.  
• Cleaning intervals as well as the formation of water spots will be greatly reduced.

Will last up to 3 years with routine maintenance with SIMC.
SI07

Protector Kit
Stainless Steel/Aluminum/Chrome

Product ID  : SI070KIT  30 ml +/- 15 m²
            : SI070100  100 ml +/- 50 m²
Consumption : +/- 2 ml/m²
Used for    : Stainless steel, aluminum, chrome, paint, varnish
Application field : Hotels, office buildings, residential housing, airports, medical centers, schools & more

SI07 is an ultra long-lasting invisible surface coating which forms semi-permanent molecular bonds with the surface.

- Two simple steps: Clean and Apply
- Fingerprints can easily be removed with a microfiber towel.
- Anti-bacterial properties boost hygiene level
- Surface has an outstanding hydrophobic effect, and stays cleaner longer.
- The coating has a hardness of H9 (anti-scratch)
- Protects against corrosion.

Will last up to 5 years with routine maintenance with SIMC.
SI08/SIFX
Protects Stone / Wood
Fabrics / Leather / Carpet

Product ID : SIO81000 / SIFX1000 1 L Sealer +/- 25 m²
Consumption : +/- 40 ml/m² (stone/fabric) +/- 20 ml/m² (leather)
SIO8 Used for : Natural stone, lacquered wood
SIFX Used for : Textiles, leather, carpets and canvas
Application Field : Hotels, office buildings, residential housing,
                   airports, medical centers, schools & more

The SI08/SIFX invisible sealants form a durable bond that is breathable and flexible with textile fibers and leather surfaces.

• Water and dirt are effectively repelled, and spills are easier to remove.
• Hygiene goes to a higher level.
• This coating has an outstanding hydrophobic effect, making fabrics, leather, and carpets stay cleaner and drier longer.
• Cleaning intervals on carpets are longer, and the need for restoration will be greatly reduced.
• Natural stone and wood are protected against the penetration of pollution.

SI08 will last for 5 years, SIFX 1-3 years.
HOW TO USE:
NANO-CERAMIC SIO6, SIO7, SIO8, SIFX

These products can be stored for up to 24 months (in a dry, temperature-stable, dark environment).

Ambient temperature:
5-30° C - Avoid direct sunlight and/or high air humidity.

IMPORTANT:
Before you use a NANO-CERAMIC product, please make sure you wear suitable protection gear. We always recommend to use latex or nitrile gloves to make sure your hands are protected from any possible damage to your skin. Use a mask for extra safety.

CLEANING
Clean the surface thoroughly with our Steril Cleaner until it is absolutely clean. If necessary, use our Scrub Cleaner or Reactivating Pure Shine Shampoo in advance. Make sure that all contamination is removed so that the glass coating can bind properly onto a clean surface. Make sure that the surface is completely dry before application!

APPLICATION OF SIO6
Apply the nano layer with a cotton pad. Spread 5-6 drops/m2 of SIO6 on the cotton pad and apply it to the surface with firm pressure in smooth motions until all of the product is evenly distributed and very little residue is visible. Remove the residue with a soft, clean microfiber cloth. After a minute, buff the surface gently to take the haze away. You don’t need to use much pressure. Note: Close the bottles tightly if you want to save the contents for future use.

APPLICATION OF SIO7
Shake the bottle very well before use! Take a soft cotton pad and pour a few drops of the coating on it (start with small amounts, only a little product is needed). Moisten all the glass, steel, or wood surfaces evenly. Wait 2 minutes. When applied correctly, you can now see a light grey haze on the surface. Gently polish away the haze after all solvents are vaporized by using a clean (microfiber) cloth.

The MAIN FUNCTION OF SIO6 AND SIO7 is to seal the pores of hard surfaces and to prevent against stubborn stains and water spots. We recommend using our SIMC Multi-Cleaner to keep the hydrophobic properties strong over time.

APPLICATION OF SIO8 AND SIFX
Clean the surface thoroughly until it is absolutely clean. Make sure that all contamination is removed so that the sealant can bind properly onto a clean surface. Make sure that the surface is completely dry before application! Shake the bottle very well before use! Put it into a sprayer and spray until the surface is saturated, and let the surface dry for 24 hours. Shake the bottles very well before use! Put it into a sprayer and spray until the surface is saturated, and let the surface dry for 24 hours.

CURING TIME
Immediately after polishing, the coating is dry and resistant to touching. At normal ambient temperature, the coatings are completely cured after approximately 12 hours.
Si-Multi Maintenance Cleaner
Hydrophobic & Disinfectant

Product ID: SIMC1000  400 m²
Consumption: +/- 2,5 ml/m²
Used for: Glass / chrome / porcelain / vinyl / acrylic / mirrors
Application field: Hotels, office buildings, residential housing, airports, medical centers, schools & more.

Si-Multi Cleaner forms semi-permanent molecular bonds while cleaning, providing a disinfectant hydrophobic nano layer on the surface.

• High-tech cleaning agents make it easier and quicker to clean surface contaminants.
• Outstanding hydrophobic effects drastically reduce adhesion of dirt, keeping the surface cleaner longer.
• The bacterial disinfectant present in the hydrophobic nano layer eliminates viruses and bacteria and reduces the chance of contamination, the disinfection process continues as long as the nano layer is present on the surface.

EASY APPLICATION: CLEAN, WIPE, BUFF OFF
Shake the bottle very well before use! Lightly mist 2-3 sprays on a microfiber applicator (start with small amounts; only a little product is necessary). Moisten all the panels evenly. When applied correctly, you will see a light grey haze on the surfaces. Polish away the haze using a clean (microfiber) cloth.

CURING PERIOD
Immediately after polishing away the haze, the layer can be touched. At normal ambient temperature, the sealant is completely cured after approximately 10 minutes. Will last up to 3 months.
Si-Nano Protect Gloss Sealer Hydrophobic

Product ID: SIGS1000  400 m²
Consumption: +/- 2.5 ml/m²
Used for: Marble / granite / wood / plastics / metal
Application field: Hotels, office buildings, residential housing, airports, medical centers, schools & more

The Si-Nano Protect Gloss Sealer forms semi-permanent molecular bonds to protect hard surfaces.

• Brings dull and weathered surfaces back to life, leaving a clean satint-gloss finish
• This sealant has a hydrophobic effect, that makes it an ideal product for preventing drying rings on tables
• The bacterial disinfectant present in the hydrophobic nano layer eliminates viruses and bacteria and reduces the chance of contamination, the disinfection process continues as long as the nano layer is present on the surface

EASY APPLICATION: CLEAN, WIPE, BUFF OFF
Shake the bottle very well before use! Lightly mist 2-3 sprays on a microfiber applicator (start with small amounts; only a little product is necessary). Moisten all the panels evenly. When applied correctly, you will see a light grey haze on the surfaces. Polish away the haze using a clean (microfiber) cloth.

CURING PERIOD
Immediately after polishing away the haze, the layer can be touched. At normal ambient temperature, the sealant is completely cured after approximately 10 minutes. Will last up to 3 months
SHRE

Reactivating Pure Shine
Shampoo

Product ID : SHRE1000 1 L
Consumption : 20 ml : 10 Liter Water
Used for : Daily cleaning
Application field : Hotels, office buildings, residential housing, airports, medical centers, schools & more.

Reactivating Pure Shine Shampoo is an advanced technology, multi-purpose foaming cleaner containing a rinsing aid that will leave hard surfaces nearly dry after rinsing with clean water.

To assure the "easy-to-clean" effect that our nano layers provide, surfaces should be free of dyes, waxes or polymer sealants.

This multi-purpose cleaner contains no polymers or colors and will not leave a film of chemicals behind on the surface.

100% Safe to use for cleaning all non-porous surfaces and meets food grade classification for kitchens.

Dilution ratio 1: 500

NANO-CERAMIC®
THE NEW GENERATION COATINGS
NANO-CERAMIC.COM
WSRE

Water Spot Remover
Biodegradable & Safe to Use

Product ID: WSRE1000  1 L
Consumption: +/- 2 ml/m²
Used for: Hard surfaces
Application field: Hotels, office buildings, residential housing, airports, medical centers, schools & more.

This fully biodegradable stain remover is made with a superior synergistic blend of environmentally friendly acids to boost cleaning performance and potential cost-savings. WSRE is ideal for removing mineral deposits from glass, steel, porcelain, and many other materials.

- WRSE is anti-corrosion and safe to use on all hard surfaces.
- WRSE prevents the deposition of soap residue and can be used to dissolve limescale formed by hard water.
- GHS label: NO health hazard label or acute toxicity
- Readily biodegradable (OECD)

Safe to use

NANO-CERAMIC®
THE NEW GENERATION COATINGS
SCRUB

Scrub Cleaner
Non-Scratching

Product ID: SCRUB1000 1 L / 400 m²
Consumption: +/- 2.5 ml/m²
Used for: Hard surfaces to remove mineral deposits
Application field: Hotels, office buildings, residential housing, airports, medical centers, schools & more.

Scrub Pretreatment Cleaner is a smooth rubbing compound, suitable for scrubbing glass, steel, porcelain and many other materials without scratching the surface.

If you need more scouring power, then please use our specially designed scrub pad.

Leaves no scratches behind after treatment.

Floor Nano-Polish
Hard and Long-Lasting

Product ID: SIFP1000 1 L / 200 m²
Consumption: +/- 5 ml/m² or 50 ml/m² ready to use
Used for: Marble / granite / tile / wood flooring
Application field: Hotels, office buildings, residential housing, airports, medical centers, schools & more.

Floor Nano-Polish consists of the latest advanced material composition, making a flexible, yet harder and more durable floor protection than our competitors.

A simple 1:9 dilution with normal water allows an easy to apply polish time saving process that requires no additional water to be added.
Polish the floor until almost dry, then remove the residue.
Wait 10 minutes and finish buffing to a high gloss with a fine polish pad.

Protects 2 times longer than other solutions.

- SIFP1000 1 L
- SIFP5000 5 L
- SIFP020L 20 L
