NANO-CERAMIC Sirp is an invisible, high-tech glass coating that seals pores with a nano silica layer, which provides a remarkable hydrophobic effect, so surfaces stay drier and cleaner. The coating disappears over time due to abrasion and can last up to 3 years if used in combination with our SHRE Shampoo. Use our Steril Cleaner before application. Easy to apply with microtowel. Just spray, wipe, wait a minute, and gently buff off.

**BI-MONTHLY CLEANING**  **HYDROPHOBIC COATING**  **SPRAY & WIPE & BUFF**

NANO-CERAMIC Sterile Pretreatment Cleaner is a 100% sterile mixture, formed with other ingredients for a sterile and outstanding bonding surface for high-tech nanoscale coatings. Before applying any sealant or coating, it is important to ensure the substrate is completely free of paint residue, oils, fillers and contaminants. Active ingredients that make coatings or sealants more effective at repelling water and dirt, as well as providing more durability.

**BI-MONTHLY CLEANING**  **STERIL CLEANER**  **SPRAY & WIPE**

NANO-CERAMIC SHRE (Reactivating Pure Shine Shampoo). This shampoo contains no polymers or colors and will not leave a film of chemicals behind on the surface. Conventional chemicals destroy the hydrophobic effect that our nano layer provides. Build-up of unnecessary chemicals can cause serious and permanent coloration damage to all kinds of surfaces. (Color is added to conventional shampoos for marketing purposes only!)

**DAILY CLEANING**  **PURE SHINE SHAMPOO**  **WIPE & WASH**

NANO-CERAMIC WSRE (Water Spot Remover) is fully biodegradable and safe for your skin. WRSE is made from environmentally friendly acids that can effectively dissolve calcium, magnesium, iron, and lime deposits on glass, chrome, porcelain, marble, and many other materials. We advise adding a little to our SHRE Shampoo when you wash every month. If the mineral deposits are very thick, use WSRE in its undiluted form.

**MONTHLY CLEANING**  **WATER SPOT REMOVER (ACID FREE)**  **SPRAY & WASH**

NANO-CERAMIC SCRUB (Scrub Pre-treatment) is a gentle but powerful scouring and cleaning compound, suitable for scrubbing glass, chrome, stainless steel, porcelain, marble, and many other materials without scratching the surface.

**6 MONTLY CLEANING**  **NON SCRATCHING SCRUB**  **SCRUB & WASH**

NANO-CERAMIC The All-Purpose Cleaner is an all-surface, low-foaming, odor-free quick interior cleaner and in particular suitable for the safe removal of stubborn stains in carpets, fabrics, vinyl and leathers.

**6 MONTLY CLEANING**  **NON SCRATCHING SCRUB**  **SCRUB & WASH**
if use the right products ... choose for a small and superior product range

NANO-CERAMIC SIGS (Si-Gloss Sealer) bonds while cleaning, forming semi-permanent molecular bonds, and providing a glossy hydrophobic nano layer to the surface. Brings dull, weathered, and damaged surfaces to life. This sealant has a hydrophobic effect, which makes it an ideal product for tabletops, protecting the original surface against water spots.

MONTHLY CLEANING

NANO-CERAMIC SIFP (Si-Floor Protector) is a completely new formula that makes your flooring 2 times harder and more durable. It is so easy to apply: Simply dilute it 1:9 with water. This polish saves time and is easier to apply than other conventional polish compounds because you don't need to add extra water during polishing. Simply polish the surface until almost dry and remove the residue.

BI-MONTHLY

NANO-CERAMIC Si07 is an ultra long-lasting invisible hydrophobic coating which forms near-permanent molecular bonds with the surface in two simple steps: Clean and Apply. Fingerprints can easily be removed with a dry microfiber towel. The surface is more hygienic because the smooth coating keeps bacteria from sticking. The coating has an anti-scratch hardness of H9 and protects the surface against corrosion. (Can be used in showers and on chrome surfaces).

EVERY 5-YEAR

NANO-CERAMIC Si08 transparent sealer bonds to the surfaces of natural stone and wood. Prevents water and dirt from penetrating into the surface. This layer has a remarkable hydrophobic effect that keeps the surface cleaner and drier. Natural stone and wood are protected against the penetration of pollution and the effects of weathering.

EVERY 5-YEAR

NANO-CERAMIC SIFX Transparent Sealer bonds to the surfaces of leather and textile. Water and dirt are effectively repelled by this durable dirt barrier with a remarkable hydrophobic effect that keeps the surface cleaner, drier, and protected against environmental pollutants.

EVERY 2 YEAR

NANO-CERAMIC If the glass is too much affected that it can not be cleaned with our SCRUB or WSRE remover then please call our nearest distributor, they will offer you our fix price/m2 to polish the surface in question in a professional way.
